Date of Hair Sampling _____ Color of Hair _____

Sample taken from what Location on Body? _____

What health conditions does your dog have? _____

What food is your dog currently eating? _____

Which supplements or medications is your dog taking? _____

Prepare a Hair Sample

Take a hair sample that weighs approximately 125 mg (about 1/2 Tablespoon) as close to the skin as possible from the chest area.

- The hair should be no longer than 1-1/2 inches.
- For long haired dogs, cut the extra length off and keep the 1-1/2 inch section which was closest to their skin.
- For outdoor dogs wash the testing area with rubbing alcohol and let dry completely before taking the sample.

Mail the Hair Sample

Place the hair sample in a paper envelope. Do not use plastic or zip-lock baggies and do not tape the sample to a piece of paper or put it in aluminum foil. Plastic, glue and aluminum will contaminate the hair sample.

Return the envelope with hair sample and a completed intake form. Intake form can be uploaded on line or can be printed off, filled out manually, and mailed with your hair sample.

Email two pictures of your dog: one full body and one portrait.
