Health Information

Name of Horse:

Mare or Gelding:

Breed:

Age:

- 1) How long have you owned your Horse?

- 2) What kind of riding/activities/competitions is your horse involved in?

- 3) List current health problems:

- 4) What health problems occurred in the past - including accidents and surgeries:

- 5) What type of hay, grain and/or feed is your horse currently eating?
If your horse is on any commercial feeds please attach an ingredient list.
**Note: a Guaranteed Analysis is NOT an ingredient list – I need the exact ingredients, E.g. alfalfa, oils, oats, corn, wheat, beet pulp, soybeans, etc...

- 6) Please list all medications and/or supplements:
Attach an ingredient list for all combination supplements.

- 7) What type of de-wormers do you use and when was the last de-worming?

- 8) List any known allergies or sensitivities:

- 9) List your horse's vaccine history (if known):

- 10) What other information is relevant to your horse's current health condition including behaviour and emotions:

- 11) What other holistic therapies has your Horse been treated with?

Photographs

A. Please be sure to include two pictures of your horse. The best pictures are taken outside in good light. Ensure that there is no blur. Take one complete body picture (no blanket) and one portrait picture showing your horse's face.

B. If your horse has laminitis, hoof problems, or suspected hoof problems, you must also include three pictures of one front hoof. Please follow these instructions:

Set your horse's hoof on a flat surface – concrete, wood or dry ground. Do not take pictures of your horse standing in grass, hay, snow, sawdust, bedding or other debris. Ensure that there is plenty of light – outdoor pictures are best.

1. **One picture of the bottom sole.** Make sure that the sole is cleaned out of manure, dirt, ice, snow and other debris.
2. **One picture of the side of the hoof taken from GROUND level.** If you have a camera that is not a cell phone you can set the camera right on the ground. Make sure that the picture is taken directly from the side at a 90 degree angle, not from a diagonal 45 degree angle.
3. **One picture of the front of the hoof taken from GROUND level.**
 - The hoof must be barefoot with no shoes on
 - Take hoof pictures within one week of the last trim.
 - Ensure that the pictures are not blurred.
