Supports sugar metabolism and normal healthy weight. Maintains skin health and joint mobility. Supports healthy thyroid function.

DIRECTIONS: 1 Teaspoon daily.

INGREDIENTS: 1 Teaspoon contains 750 mg of vitamin B6 (pyridoxine hydrochloride), Inulin.

BENEFICIAL FOR: Metabolism ~ Hormones ~ Joints

VITAMIN E MUSCLES & SKIN

An antioxidant that supports a healthy heart, muscle strength, and normal circulation. A traditional vitamin for all skin conditions. Combines well with Organic Selenium. Natural Source D-alpha tocopherol succinate.

DIRECTIONS: 1 Teaspoon daily.

INGREDIENTS: 1 Teaspoon contains 2,010 IU's of pure Vitamin E (d-alpha tocopherol succinate), Inulin.

BENEFICIAL FOR: Muscles ~ Circulation ~ Skin

RIVA'S MSM MUSCLES & JOINTS

An organic sulphur compound to support muscle and joint health. Maintains a healthy musculo-skeletal system. Supports mobility in senior horses.

DIRECTIONS: 1 Teaspoon daily.

INGREDIENTS: 1 Teaspoon contains 3,865 mg of MSM (Methylsulfonylmethane). Once daily for 30 days or as needed.

BENEFICIAL FOR: Joints ~ Tissues ~ Muscles

VITAMIN B12 ENERGY & NERVES

Supports a healthy nervous system, mental wellness, and energy levels. Maintains healthy hindgut function as well as liver health.

DIRECTIONS: 1 Teaspoon daily.

INGREDIENTS: 1 Teaspoon contains 6,000 mcg of Vitamin B12 (Methylcobalamin), Inulin.

BENEFICIAL FOR: Energy ~ Nerves ~ Hindgut

ZINC CITRATE SKIN & IMMUNITY

Supports sugar metabolism, hormone balance, and a healthy immune system. Maintains skin health, wound healing, and normal vision. Promotes healthy hooves.

DIRECTIONS: ½ to 1 Teaspoon daily.

INGREDIENTS: 1 Teaspoon contains 150 mg of Zinc Citrate, Inulin.

BENEFICIAL FOR: Skin ~ Immunity ~ Hooves

RIVA'S HAPPY HORSES

INSULIN RESISTANT ANGIE LOSES WEIGHT

This is Angie; a 16-year-old Morgan mare. When Angie's owner originally contacted us, she wanted to improve many aspects of her health. Angie was Insulin Resistant and was also struggling with very poor digestion. She was feeling cranky and cinchy from digestive discomfort, and she was also stiff and stocking up. She was breathing rapidly at times and had gained a lot of weight. And she was having reactions to annual injections with localized swelling and swollen back legs.

Angie's first health program focused on starting her with general detoxification, balancing her blood sugar, and helping her digestive system. Angie was already getting a lot of exercise, but her weight didn't change so we got started with a complete diet overhaul including a different kind of hay. We added more fibre to improve digestion and detoxification, as well as essential fatty acids to help with inflammation and hormone balance.

Angie started with **Pro-Colon probiotics** (digestion), homeopathic **Metabolism Drops** (blood sugar), **Equi-Cleanse** herbal blend (liver support), and the nutrients **Magnesium Citrate, Vitamin E, B6, and B12**.

There were two or three more adjustments to Angie's program along the way and it took about ten months for her to make the transformation to good health. Angie lost weight, her crested neck came down, she was no longer stocking up, her breathing returned to normal, she wasn't cranky or cinchy, and her energy improved.

Congratulations Angie! You look like a brand new horse!

MORE ENERGY FOR ADIRA

"Hi, I just did blood work on my mare who has anemia and the vet is very happy with her improvements. She is nearing normal ranges and her hemoglobin is normal now! The Iron-Up has helped and I'm so happy. My girl has more energy, and is even a bit spicy sometimes... lol. I will continue using the Iron-Up and the vitamin B12. Thank you for your help. Cheers!"

FOOD ALLERGIES AND SENSITIVITIES

TAKE THE GUESSWORK OUT OF YOUR HORSE'S FEED PROGRAM

Our domestic horses are getting more sensitive to food than ever. Many of them are experiencing an epidemic of food problems, feed reactions, immune system breakdowns, and metabolic problems which affect their immune system.

You would think that it would be simple to feed a horse. But a lot of different feeds have entered the market over the years – some good, some not so good. And not only that, but the crops have changed, and there are many different kinds of hay, grains, and legumes, all of which are grown and harvested differently than previous years. The soil is over-fertilized, fertilizers often contain toxic heavy metals, GMO crops are common, and the use of glyphosates is rampant. So, the forage and the feed is just not what it used to be. And our horses are suffering the consequences.

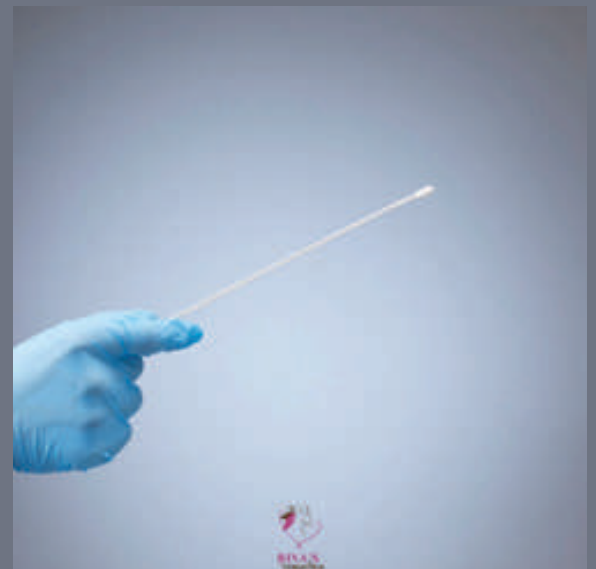

Horses of all breeds and all ages everywhere are showing adverse signs of this changing feed industry. And while horses are tremendously adaptable and resilient, all of these unnatural practices have taken their toll. But we can help make them stronger.

To optimize their health and immunity we need to customize the feed program by eliminating the foods that they don't tolerate and also keep the unhealthy ingredients to a minimum. Instead, they need food that doesn't cause a stress reaction but provides them with healthy nutrients to support the immune system and optimizes their physical, emotional, and mental health.

HOW DOES THE TESTING WORK?

With a simple saliva test, we can test over 125 allergens including food, grains, environmental sensitivities, insect bites, and some supplements. Obtaining the saliva sample from your horse is easy and done with a soft cotton swab placed on the inside of their mouth, usually the cheek or under the tongue, wherever your horse is comfortable. The sample is then analyzed in the laboratory using the ELISA method of testing. The ELISA method is the gold standard of immunosorbent assays and is a highly sensitive test which accurately identifies food allergies, sensitivities, and intolerances.

Once any problem foods are eliminated and the environmental issues are addressed the impact can be profound. Symptoms and long-term inflammatory responses you thought would never resolve soon disappear. Horses will experience more energy and vitality, a stronger immune system, reduced inflammation, a healthier skin and coat, calmer behaviour, and improved well-being.

STRIKER

CLEAR SKIN FOR STRIKER

"Striker had a growth on his nose (the size of a marble) that three different vets said needed to come out surgically. It was either cancer or a funky sarcoid that could only be identified after removal. I wanted to wait a few weeks until after the fly season was over before we proceeded with the surgery. During that time, I came across Riva's **Equi-Derm** herbal blend and decided to give it a try. After the first week, the growth dried up. After the second week, it fell off!! It was amazing! So, no surgery! We gave him the **Equi-Derm** every summer subsequently as a preventative measure especially since that spot on his nose was very light in colour and sensitive to the sun. Nothing ever reappeared! He also had used **Happy Horse Senior** herbal blend and **Equi-Cleanse** herbal blend since our first discovery of Riva's Remedies. That was about 4 years before he passed away on Oct 4th, 2024 at the age of 30.5 years. We helped him cross over with his friend in a beautiful ceremony."

... S. HEGMANN

GRACE'S SWEET RELIEF

"For years my horse and I have struggled with her sweet itch. I thought we had tried pretty much everything to bring her relief. And then I saw a passing reference to the Riva's Remedies Sweet **Itch Summer Tincture** and **Vitamin C**. I ordered it, got it, and the results were almost instant. Not only is the sweet itch under control, but Grace is clearly happier and healthier. What a relief – for both of us! So grateful, thank you!"

OREO LOVES HAPPY FOOT

We are always amazed at the results that horses get with the Happy Foot Herbal Blend. It is blended to improve circulation, relieve pain, and provide specific nutrients to support hoof health. And yes, if you put your nose close the bag the cayenne pepper included in the blend will surely clear up some passages!

"My pony had severe laminitis and was at the point that the vet gave up. **Happy Foot** helped her to get a lot better along with lots of walking. She ate it without any problem. And, it cleaned out my sinuses."

...BAUDINA S.

CHAMP'S LEG WOUND

23-year old Champ somehow got an unexplained injury on his coronet band. But after 2 weeks on **Vitamin C**, the homeopathic **Tissue Aid** and the **Riva's Herbal Skin Oil** applied topically his wound is nicely healed up!

HAPPY HORSE HERBAL BLEND

NATURAL VS SYNTHETIC

One of the most common questions that we receive from our customers is whether we have a breakdown or an analysis available for the nutrients in our Happy Horse herbal blend.

The Happy Horse was formulated by our CEO, Marijke van de Water. She created this product to provide a wide spectrum of natural vitamins and minerals which are easily absorbed in a plant-based form. Because plants are part of our horse's natural environment, and therefore already in their food chain, the nutrients in plants are easily chewed, digested, absorbed, and assimilated. Assimilation means that they incorporate the nutrients into the body's tissues and organs after digestion.

This is in contrast to the ingredients in the synthetic blends which are synthesized artificially and manufactured in chemical laboratories. They are then sold as a nutrition or mineral supplement. Synthetic vitamins and minerals are more difficult for the body to absorb, and with so many ingredients in the product many of the minerals and nutrients compete for absorption. (Copper and zinc as well as magnesium and calcium are examples of competitive minerals.) That's why so many horses are still deficient, no matter what they are being supplemented with. This is especially true if they have health problems. On the other hand, some of them are getting too much. It is hard to determine what each horse needs for a multiple vitamin and mineral mix because their requirements are highly individual and cannot be determined without a complete assessment of diet and feed, lifestyle, health history, gut health, exercise program, and stress levels. Therefore, supplements of any kind cannot guarantee that your horses are getting everything they need. Or don't need for that matter.

~ MOTHER NATURE CANNOT BE REPRODUCED IN THE LAB ~

But synthetic formulas can provide you with a guaranteed analysis. That's because they are synthesized by people, not by nature, and so they can do an analysis in the chemistry labs during manufacturing. Herbs and herbal blends, on the other hand, do not come with a "nutritional analysis" in the same way that synthetic vitamin and mineral formulas do. Herbs and herbal blends are unique in that their composition is complex and variable, and also dependent upon species, geography, and growing conditions. Thus, a guaranteed nutritional analysis of herbal ingredients, other than basic information, is impossible.

The real benefit of plant medicine blends is that they work together in a synergistic form with health promoting properties. And all of the vitamins and minerals that they contain are formulated perfectly by Mother Nature; something that cannot be reproduced in the lab. Natural plant nutrients are easily digested and assimilated with superior rates of absorption. That's why it's so important, where possible, to provide horses with a variety of natural grazing areas so they can seek out many of the plants that give them the nutritional and health benefits that they need. This behaviour is known as Zoopharmacognosy or "animal medicine knowledge".

For those horses without much selection, the Riva's Remedies Happy Horse and Happy Horse Senior can help give them some healthy choices from nature. These blends are 100% plant-based and contain over sixty-five naturally occurring trace minerals, vitamins, and antioxidants which support the hair coat, hooves, skin, liver, immunity, and many other body systems. The plants and herbs are sourced from both the land and the sea with blueberry fibre, flax seeds, kelp, Irish moss, dulse, oat straw, and rosehips. The Senior blend adds beet root powder and sage.

We do not make any claims about the Happy Horse blends being a complete or balanced mineral mix, nor its ability to correct deficiencies. That's not what plants are all about; they are offered to the horses to give them a plant-based source of easy to digest nutrition and phytonutrients that they might not otherwise have access to.

TAKE THE GUESSWORK OUT OF HEALTH CARE

MARIJKE & SAPPHIRE

OUR STANDARDS ARE HIGH

MARIJKE VAN DE WATER, B.SC., DHMS, CEO

As the founder and formulator of Riva's Remedies I have applied to each and every product more than 25 years of an active health practice, extensive knowledge, ongoing research, medical intuition, a passion for holistic health, and a love for all horses. You can be assured that all of our products are prepared with exceptional ingredients and precise intentions to deliver consistent and extraordinary results time and time again. Our reputation of "products that work" is well-deserved and based on thousands of success cases. I wish all of your horses outstanding health, happiness and harmony.

Who is Riva?

Riva was the long-time companion to Marijke and the namesake of Riva's Remedies. She was the great granddaughter of Riva Ridge who was the champion racehorse that ran alongside Secretariat. Our Riva not only inherited his fire but also his passion and his heart. During her time, Riva championed tens of thousands of horses and their people and blessed every one of Riva's Remedies with love, compassion, and healing. Riva was laid to rest on July 07th, 2022 at the age of 25. She continues to touch the hearts of many and will always send out endless healing energies to animals and people everywhere. Her healing spirit will never die.

Love to all . . .
Riva, Marijke, & Elisha

ELISHA WITH RIVA AND SAPPHIRE

CHECK OUT OUR ONLINE COURSES!

We have always maintained that the key to optimum horse health care is through education. Therefore, any mission that sets out to improve health and wellness for the natural horse has to involve their people. With this in mind we are always excited to provide the horse community with a selection of online courses and membership groups that are user friendly, interactive, and highly educational.

Resolving Equine Metabolic Syndrome Naturally

This is a self-paced short course available at any time. This course will walk you through the process of formulating a specific feed, remedy, and supplement program for all EMS conditions including Insulin Resistance (IR, Cushing's Syndrome (PPID), and Polysaccharide Storage Myopathy (PSSM). You will learn strategies for prevention, recovery, and maintenance.

Courses are instructed by Elisha Edwards, B.Sc., MBA. Elisha is a Natural Horse Health Practitioner with a strong background in the biological sciences, natural horse health care, and education.

For more information visit www.elishaedwards.com or email Elisha at: support@elishaedwards.com

Healing Horses Their Way

This is a 12-week VIP program for those who want to take a deep dive into the world of holistic health care for horses. This program will show you how to identify the true and underlying cause of equine diseases and how to address them with a holistic approach. Over the 12 weeks you will learn how to navigate the complicated world of equine feed and how to use diet, therapeutic nutrition, medicinal herbs, and homeopathic remedies to both prevent and address almost all health conditions.
