Health Information

Name of Horse: _____

Breed: _____

Age _____ Weight _____ Gelding or Mare _____

Pregnant: Yes or No

Date of Hair Sampling _____

Colour of Hair _____

Which location on the body did you take the sample from? _____

What are the primary and current health concerns? _____

List past health conditions if known.

List any known allergies or sensitivities.

List the types or chemical or herbal dewormers that were used in the last 12 months and the months they were given.

List your horse's vaccine history and when they were administered.

List any other information that is relevant to your horse's health conditions including behaviour, herd dynamics, and emotions.

How long have you owned your horse? _____

Which activities/riding does your horse do? _____

What type of hay, grain and/or feed is your horse currently eating?

If your horse is on any commercial feed, please attach an ingredient list.

****Note: a Guaranteed Analysis is NOT an ingredient list. Please list the exact ingredients, e.g. alfalfa, oils, oats, corn, wheat, beet pulp, soybeans, minerals, etc....**

Please attach a hay analysis of the current hay if you have one.

Please list all medications and/or supplements including vitamin/mineral mixes.

Attach an ingredient list or a picture of the label for all combination supplements. Please don't provide the website link in lieu of an ingredient list.

Photographs

A. Please be sure to include two pictures of your horse. The best pictures are taken outside in good light. Ensure that there is no blur. Take one complete body picture (no blanket) and one portrait picture showing your horse's face.

- B. If your horse has laminitis, hoof problems, or suspected hoof problems, you must also include three pictures of one barefoot front hoof (no shoes). Please follow these instructions:

Set your horse's hoof on a flat surface - concrete, wood, or dry ground. Do not take pictures of your horse standing in grass, hay, snow, sawdust, bedding or other debris. Ensure that there is plenty of light - outdoor pictures are best.

1. One picture of the bottom sole. Make sure that the sole is cleaned out of manure, dirt, ice, snow, and other debris.
2. One picture of the side of the hoof taken from GROUND level. If you have a camera that is not a cell phone, you can set the camera right on the ground. Make sure that the picture is taken directly from the side at a 90-degree angle, not from a diagonal 45-degree angle.
3. One picture of the front of the hoof taken from GROUND level
Take hoof pictures within one week of the last trim.

Cut the Hair Sample

Take a hair sample that weighs approximately 125 mg (about ½ Tablespoon) as close to the skin as possible from the base of the mane. Wash the testing area with rubbing alcohol and let dry completely before cutting the sample. Or, you can clean the sample with rubbing alcohol after cutting and then let dry.

- The hair should be no longer than 1-1/2 inches.
- Cut the extra length off and keep the 1-1/2-inch section which was closest to the skin.

Mail the Hair Sample

Place the hair sample in a paper envelope. Do not use plastic or zip-lock baggies and do not tape the sample to a piece of paper or put it in aluminum foil. Plastic, glue and aluminum will contaminate the hair sample.

Return the envelope with the hair sample and the completed intake form.

Print, fill out, and mail with your hair sample.
